

AaronBux MVP Roadmap

⚡ Key Points for Product & PM Team

1. **Early MVPs** = growth + data collection → low/no pricing
2. **MVP 2 onward** = transactional revenue + subscription introduction
3. **MVP 5 onward** = true fintech model → brokering fees + premium tier
4. Pricing grows with **value delivered + regulatory complexity**

⚡ Notes for Product & Design Team

1. **AI as the core interface:** By MVP 10, minimal client navigation is needed; AI acts as the “financial assistant” for all actions.
2. **User control with compliance:** Trades require client signature for execution; AI provides recommendations and executes upon acknowledgment.
3. **Alerts & notifications:** Critical for trust—real-time guidance on portfolio changes, stop-loss triggers, and market conditions.
4. **Progressive UX:** Each MVP builds toward **seamless AI interaction**, reducing friction for first-time investors.

AaronBux Pricing Tiers by MVP

MVP	Features	Pricing Tier	Notes / Revenue
MVP 1 – Beta	3-min quiz, predefined portfolio frameworks	Basic (Free)	Educational only, no AI, focus on user acquisition
MVP 2 – Beta 2	Personalized portfolios based on user info (age, risk, interests)	Basic (Free), Plus (\$1.99)	No AI, collecting user data for future personalization
MVP 3 – Trading (Stocks/Crypto)	Buy/sell via Alpaca & Plaid, portfolio dashboard	Basic (Free), Plus (\$4.99)	Basic: guidance only; Plus: real-time market info + alerts; revenue via brokerage fees (~0.65%)

MVP 3.5 – AI Premium	AI-assisted recommendations, rebalancing, risk alerts	Premium (\$24.99)	Full AI model, actionable insights, alerts, portfolio simulations
MVP 4 – Gold Marketplace	Buy, store, or deliver gold	Basic / Plus / Premium	Transaction spread + subscription revenue; Basic: guidance only, Plus: alerts, Premium: AI-driven trade recommendations
MVP 5 – Real Estate Syndication	Fractional real estate investments	Plus (\$4.99) or Premium (\$24.99)	Brokerage fee on deals + subscription; Premium tier gets AI suggestions on optimal investments
MVP 6 → 10 – Ownership Economy + Autopilot	AI-managed portfolio, fractional property & gold ownership, stop-loss automation, real-time alerts, ATMs for deposits	Basic / Plus / Premium	Revenue: brokerage fees + subscription + fractional ownership spreads; Premium: full AI autopilot & trade execution

⚡ Tier Breakdown

1. **Basic (Free)**
 - Limited AI guidance (educational & portfolio suggestions)
 - Market data: delayed or static
 - Minimal alerts
2. **Plus (\$4.99/month)**
 - Real-time market data
 - Portfolio movement alerts
 - AI guidance on trade outcomes (not full execution)
 - Suitable for active DIY investors
3. **Premium (\$24.99/month)**
 - Full AI model: portfolio recommendations, rebalancing, stop-loss, trade simulations
 - AI can guide & eventually execute trades (with client approval)
 - Alerts + full analytics + insights on multi-asset growth

MVP 1 – Beta (Educational Quiz & Portfolio Models)

- Educational: 3-minute quiz

- Portfolio model styles (predefined frameworks)
 - Goal: help users understand basic investing concepts
 - **No AI functionality**
 - **Pricing: Free**
 - **Reason: Focus on growth, user acquisition, and collecting initial engagement data.**
-

MVP 2 – Beta 2 (Personalization)

- Collect key user info:
 - Age, risk tolerance, demographics
 - Top companies/industries of interest
 - Modern investment preferences
 - Generate **personalized portfolio frameworks** based on user inputs
 - Goal: match portfolio style to user interests & risk
 - **No AI functionality**
 - **Pricing: Free or optional early-access “insights” tier (\$1.99 month)**
 - **Reason: Encourage more users to provide data; still educational, no execution.**
-

MVP 3 – Execution (Trading: Stocks & Crypto via Alpaca & Plaid)

- Introduce AI for the first time (optional guidance only)
 - Account creation + KYC
 - Bank linking (Plaid)
 - Buy/sell stocks & crypto (Alpaca)
 - Portfolio dashboard
 - Brokerage fee (~0.65%)
 - **Pricing: \$24.99/month**
 - **Reason: High-value AI guidance for users who want active insights, rebalancing, risk analysis, and alerts**
-

MVP 4 – AI Premium (\$24.99)

- AI portfolio recommendations
- Rebalancing insights
- Risk analysis & alerts
- AI chat guidance (“Explain my portfolio”)
- **Pricing: \$24.99/month (can bundle with AI Premium)**
 - **Revenue: Transaction spread / margin on gold purchases**

- Optional: small fee per order (e.g., \$1–\$5 per transaction)
-

MVP 5 – Gold

- Gold marketplace (buy, store, or deliver)
 - Order tracking
 - **Pricing:** \$24.99/month (bundled with AI Premium)
 - **Revenue:**
 - Gold transaction spread / margin
 - Brokerage-style fee for gold trades
-

MVP 6 – Real Estate

- Fractional real estate investments
 - Deal marketplace & returns tracking
 - **Pricing continues as above**, with additional value-adds:
 - Gold depository & trust (transaction fees + spread)
 - Fractional ownership of high-value properties
 - Full AI autopilot for portfolio management
 - Advanced analytics and trade execution alerts
-

MVP 7 – Ownership Economy

- AaronBux gold depository
 - Fractional ownership in hotels, casinos, resorts
 - Income + ownership tracking
 - **Pricing continues as above**, with additional value-adds:
 - Gold depository & trust (transaction fees + spread)
 - Fractional ownership of high-value properties
 - Full AI autopilot for portfolio management
 - Advanced analytics and trade execution alerts
-

MVP 8 – Advanced AI Asset Modeling

- Growth projections for all assets
- Predictive simulations for portfolio optimization

- AI portfolio performance forecasts
 - **Pricing continues as above**, with additional value-adds:
 - Gold depository & trust (transaction fees + spread)
 - Fractional ownership of high-value properties
 - Full AI autopilot for portfolio management
 - Advanced analytics and trade execution alerts
-

MVP 9 – Multi-Asset Autopilot

- AI autonomously rebalances all asset types
 - Automatic alerts & recommendations for buy/sell/hold
 - **Pricing continues as above**, with additional value-adds:
 - Gold depository & trust (transaction fees + spread)
 - Fractional ownership of high-value properties
 - Full AI autopilot for portfolio management
 - Advanced analytics and trade execution alerts
-

MVP 10 – AI-Directed Portfolio Guidance

- Users request AI guidance on trades (stop-loss, risk adjustments)
 - AI analyzes portfolio impact and recommends next steps
 - Real-time alerts for buy/sell/hold decisions
 - **Pricing continues as above**, with additional value-adds:
 - Gold depository & trust (transaction fees + spread)
 - Fractional ownership of high-value properties
 - Full AI autopilot for portfolio management
 - Advanced analytics and trade execution alerts
-

MVP 11 – Full Autopilot Fintech Platform

- Users instruct AI on desired portfolio actions
- AI simulates trade impact & executes changes with **client acknowledgment**
- Fully automated stop-loss & risk management
- Real-time buy/sell/hold alerts
- AaronBux-branded ATMs for deposits
- Fractional ownership of all assets
- AI-managed autopilot across all investments
- Monetization: brokerage fees + AI premium subscribers + asset growth
