

AaronBux – MVP 2 (Execution + AI Premium Layer)

Objective

Build a **trading-enabled platform** with AI-powered insights and recommendations, leveraging:

- Alpaca (execution layer)
- Plaid (bank linking & funding)

Goal:

 Enable users to **invest, track, and receive intelligent portfolio guidance**

Core Features (MVP 2 – Execution Layer)

1. Account & Onboarding

- User account creation
 - KYC / identity verification flow
 - Risk profile + basic onboarding inputs
-

2. Banking & Funding (Plaid)

- Bank account linking
 - Deposit / withdraw funds
 - Display available buying power
-

3. Trading (Alpaca)

- Buy / sell stocks
 - Buy / sell crypto (if enabled)
 - Order execution + confirmations
-

4. Portfolio Dashboard

- Real-time holdings

- Portfolio value + performance
 - Asset allocation breakdown
-

5. Transactions & History

- Order history
 - Deposits / withdrawals
 - Trade confirmations
-

Premium Layer (\$24.99) – AI-Assisted Insights

Positioning (CRITICAL)

We are NOT offering direct financial advice.

We provide:

 **AI-assisted insights, recommendations, and portfolio analysis**

1. AI Portfolio Recommendations

- Suggested portfolio allocations based on:
 - user goals
 - risk profile
 - Include:
 - reasoning
 - risk level
 - alternative strategies
-

2. Rebalancing Insights

- Detect portfolio drift
 - Suggest allocation adjustments (percentage-based)
-

3. Portfolio Intelligence

- Diversification analysis
 - Sector exposure breakdown
 - Risk concentration insights
-

4. Opportunity & Risk Signals

- Volatility alerts
 - Overexposure warnings
 - Market condition signals affecting portfolio
-

5. Goal-Based Planning

- Investment goal tracking
 - Suggested contribution strategies
 - Long-term projection insights
-

6. Smart Alerts

- Portfolio drift notifications
 - Risk level changes
 - Key market movements
-

7. AI “Explain My Portfolio”

- Natural language queries:
 - “Why did my portfolio drop?”
 - “What is my biggest risk?”
-

UX / Compliance Language Guidelines (MANDATORY)

Avoid:

- “Buy this stock”
- “Sell immediately”

- “We recommend you purchase X”

✓ Use:

- “Consider increasing exposure to...”
- “This portfolio suggests...”
- “A rebalancing approach could involve...”
- “Based on your inputs...”

👉 All recommendations must be framed as **informational, not directive**

💰 Pricing Structure

- **\$4.99** → Insights (MVP 1 features)
 - **\$9–12** → Execution (trading + portfolio tracking)
 - **\$24.99** → Premium AI insights & recommendations
-

⚠️ Key Constraints / Considerations

- KYC + AML required (handled via Alpaca, but impacts UX)
 - No automated trading (no “AI executes trades”)
 - No direct financial advisory language
 - Must prioritize:
 - user trust
 - transparency
 - explainability of AI outputs
-

🎯 Success Criteria

- Users can:
 - fund accounts
 - execute trades
 - view portfolio performance
- Premium users receive:
 - clear, explainable AI insights
 - actionable (but non-directive) recommendations
- System delivers:

- real-time data accuracy
 - stable trade execution
 - intuitive, trust-driven UX
-

Core Product Principle

 **Execution + Intelligence = Differentiation**

We are not just a trading platform.

We are a platform that helps users:

- understand their portfolio
- make better decisions
- invest with confidence
